

Please Make a Tin-Can Drum Kit

So your child can play
Covid-safe music with it

1) You will need:

A tin-can, opened, washed and dried
(NB check there are no sharp edges!),
A balloon,
A piece of cardboard,
A pair of scissors,
A pen,
Some tape- insulating tape is best, sellotape is OK.
Some rice/lentils/dried peas/buckwheat-
half a handful is fine.

2) You need an ordinary tin-can- not one with a ring pull.

3) Open and empty the can with a normal tin-opener:

Very important:

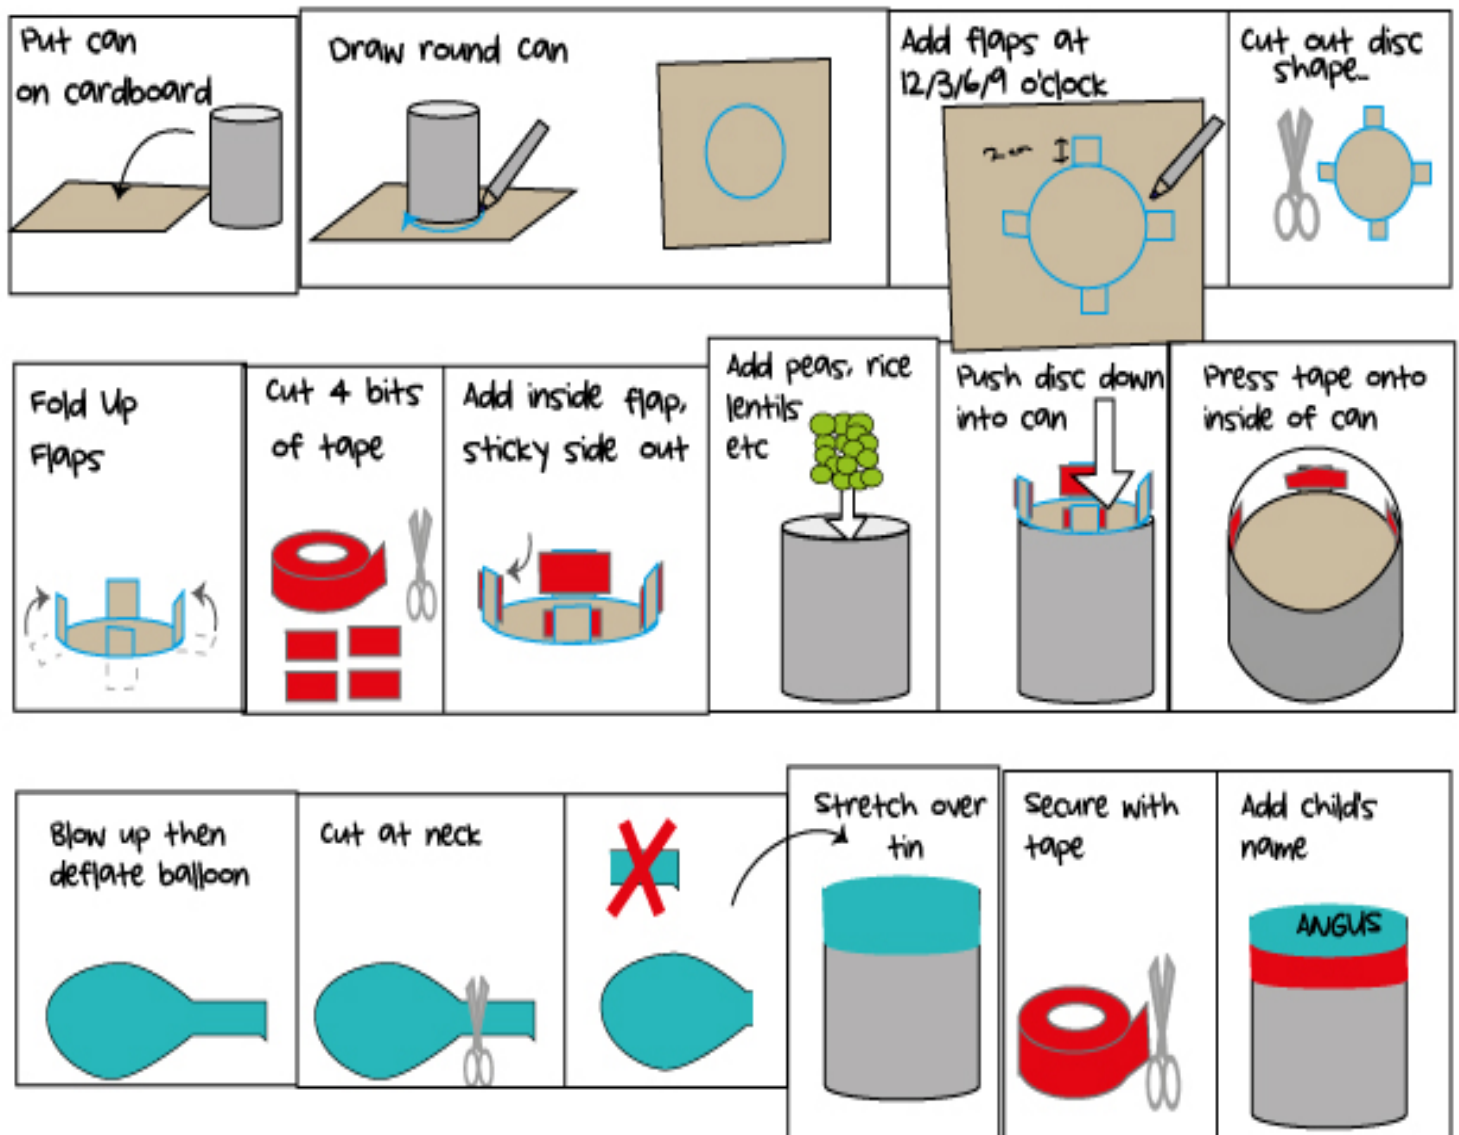

Carefully check there are no sharp edges inside the top of the can by pressing gently and slowly round with your finger!!

If there is a small sharp stub of metal left, go over the area again with the can-opener until it disappears.

4) Clean and dry the can.

Continued over page...

4) Follow these instructions...

Please return can by ___/___/___ at the latest.
Many Thanks!!

If you have time to send in a spare can or two,
it may help other children!!
